## INTRODUCTION

This booklet is provided to augment the series of maps entitled **Maine Land In State and Federal Conservation Ownership**, compiled in March, 1989 for The Land for Maine's Future Board by Richard D. Kelly Jr. of the Maine State Planning Office. The purpose of the booklet is to provide a listing of the lands which appear on the maps in a convenient form, as well as provide information on the State agencies which hold land for conservation and/or recreation in the State of Maine.

The compilation of these maps grew out of the fact that the Land for Maine's Future Board, empowered to acquire conservation and/or recreation land by Maine voters through a \$35 million bond passed in November, 1987, had no one single source or map that illustrated all of the current public conservation holdings of the State of Maine and the Federal Government. As one of the criteria for the future purchase of land is proximity to existing holdings, it was decided to map all State and Federal conservation ownership and/or recreation land on one set of maps at a usable and convenient scale.

The scale selected to map the properties was 1:250,000, or one inch equals four miles. This scale is small enough to cover the whole state with a reasonable number of sheets, and large enough to delineate actual property boundaries in most instances. These 1:250,000 scale maps correspond to the series of maps of the same scale published by the United States Geological Survey (USGS). The quadrangle names used by the USGS have been retained on the property maps.

The properties delineated on these maps represent State and Federal Lands held for conservation and/or recreation. The one exception is the lighthouse category owned by the United States Coast Guard. The lighthouses shown on the maps serve their intended function as aids to navigation, and are perceived as being of scenic, historic, and architectural significance. Many of Maine's lighthouses have been listed on the National Register of Historic Places.

Of the approximate 1,380 islands, ledges, and rocks held by the Maine Bureau of Public Lands, only those islands one acre in size and over are delineated on the maps. This cut-off point was used for mapping purposes only in order to keep the maps simple and uncluttered. The cut-off point also had the added effect of eliminating from the maps a multitude of rocks and ledges, many of which are probably under water at high tide.

Those properties too small to be mapped at this scale are delineated with a circle filled with the appropriate color. In these instances, the circle covers an area larger than the property itself. Each category of ownership is numbered on the maps separately and consecutively from west to east and from south to north by quadrangle.

All Federal and State highways and roads are shown on these maps to illustrate the transportation network. To locate a particular highway or road by route number, a road map should be used in conjunction with these maps.

These maps represent an inventory of Maine land in State and Federal conservation ownership, but do not intend to represent the legal boundaries of these properties. For further information concerning any specific property shown on these maps, contact the appropriate State or Federal Agency.

*Mail Address:* Statehouse Station #22, Augusta, Maine 04333

*Established:* October, 1973

*Organizational Units:* Operations, Planning, and Financial Management

The origin of Maine's Public Reserved Lands spans a period of nearly 300 years, dating to the early proprietors' grants from Colonial Massachusetts. However, it wasn't until the conclusion of the Revolutionary War that the tradition became firmly established. At this time, Massachusetts began disposing of its public domain lands in its northern territory (later the State of Maine), as a means to pay outstanding war debts and to encourage settlement. Initially, four 320 acre tracts, popularly known as Public

Lots, were reserved from the sale of each township. They were designated for the following purposes: one for the school, one for the first settled minister, one for the benefit of the ministry, and one for the support of the General Court of Massachusetts, or Legislature. Whether to gain revenue or encourage settlement, the land sales accomplished little more than the disposal of the public domain. More frequently than not, the land sold for less than one dollar an acre, indeed, as low as 12 cents an acre for Bingham's historic purchase of two million acres along the Kennebec River and east of the Penobscot River. Because of the harsh landscape and unforgiving climate, very little settlement actually occurred.

From 1783 to 1820 Massachusetts sold more than 6.7 million acres of the public domain. Earlier, an additional 3.7 million acres had been disposed of by the Plymouth Council, a colonial entity which existed under the authority of Charles I of England during the early 17th century.

In 1820, Maine became a State, and so began a 33 year period during which the remaining public domain was administered jointly by Maine and Massachusetts. During this time, joint sales of public domain lands amounted to 1.7 million acres. This brief period is marked by two significant events:

- 1) The Articles of Separation constitute the agreement by which Massachusetts consented to Maine's entry into the Union in 1820. These articles, subsequently incorporated into the State Constitution of Maine, established the Public Reserved Lands as a legal Trust, which could be diminished only by a Constitutional process. Thus, the Public Reserved Lands achieved a special and more permanent status, distinct from other land administered by the State.

- 2) In 1832, the two States agreed to limit the reservation from the sale of townships to 1000 acres. They also removed the religious and political provisions from the reservations, dedicating all income from these lands for school purposes. Although the significance of this action was not realized for more than a century, it subsequently provided at least a portion of the justification for later (1973) expanding the stated purpose of these lands as simply to "public use."

The year 1853 marks both the end of Massachusetts' interest in Maine and the end of the Public Domain. By 1878, having sold 3.5 million acres of public domain land on its own, Maine had at last exhausted the public domain, all but two small

parcels: 1053 acres in Sheridan (now Ashland) and 275 acres in New Sweden, both of which remain today. More important, however, it was during this period (1850) that the State of Maine initiated the sale of timber and grass rights on the Public Reserved Lands as a means of protecting this public resource from unauthorized timber harvesting. Although it was later ruled (Cushing v. State of Maine, 1981) that the rights were sold only on the timber standing at the time of sale, the transactions were generally interpreted as being of indefinite duration; and the Public Reserved Lands all but disappeared into the fabric of surrounding private ownership.

With renewed interest in public lands issues in the early 1970s, the Bureau of Public Lands was created in 1973. It was charged with administration of the Public Reserved Lands, a mandate which included (1) management of the 68,000 acres of Public Lots to which the State still held exclusive title, (2) recapture of the outstanding timber and grass rights of approximately 320,000 acres, and (3) consolidation of the many scattered parcels into larger manageable units. Consolidation was designed to increase the efficiency of administration and create a landbase which would serve broad public purposes. This was an especially important issue for, until this time, the Public Lots had been local assets, held in trust by the State for the eventual benefit of plantations and towns. With its new resolve, however (based largely on an opinion of the Justices of the Supreme Judicial Court), the State determined that these lands would become State assets, consolidated to enhance the quality of management, and administered for the general benefit of all the people.

Many of the goals of the Maine Bureau of Public Lands have been accomplished, with the result that today the Bureau administers 452,895 acres of Maine land. Included within that figure are 656 coastal islands one acre or larger in size.

List of lands administered by the Maine Bureau of Public Lands and delineated on the set of maps entitled Maine Land In State and Federal Conservation Ownership. Numbers refer to the parcel numbers on the maps.

BUREAU OF FORESTRY (aka Maine Forest Service)  
John H. Cashwell, Director

*Central Office:* AMHI - Harlow Building, Augusta, Maine  
*Telephone:* (207) 289-2791  
*Mail Address:* Statehouse Station #22, Augusta, Maine 04333

*Established:* 1891

*Organizational Units:* Division of Forest Management and Utilization, Division of Forest Fire Control, and Division of Insect and Disease Management.

The Bureau of Forestry originated in 1824 with the appointment of a Land Agent, who in 1891, was also designated Forest Commissioner. The Land Agent title was abolished in 1923 and the Agent's duties were assigned to the Forest Commissioner. In 1965, the Maine Forest Service which had evolved under the Commissioner was statutorily recognized as the Forestry Department. State Government reorganization legislation of 1973 renamed the Department as the Bureau of Forestry within the newly-created Department of Conservation, and designated the Forest Commissioner as the Director of the Bureau of Forestry.

The Bureau is divided into three functional divisions, which are listed above. Each division is administered by a chief executive officer, who is in charge of all divisional activities. Field operations are administered through functional regional supervisors.

The Bureau of Forestry, also known as the Maine Forest Service, was established to ensure for present and future generations of Maine citizens the greatest economic and social benefits from trees and the forest lands of the State. The primary responsibilities of the Bureau are: to encourage and promote appropriate forest land management practices on public and private lands; to provide advice and assistance in forest management to woodland owners; to produce, distribute, and plant forest seedlings; to promote improved markets, utilization, and manufacture of forest products; to initiate and maintain up-to-date economic data; to promote productivity and current use as the basis for forest land taxation; to encourage long-term forest management objectives; to protect the forest resource from fire, insects, diseases, and other natural enemies; to encourage and promote the planting, care and protection of shade trees, shrubs,

and forest growth by individuals, municipalities, and State agencies; to maintain and improve the scenic beauty, wildlife habitat, and recreational values of Maine; to determine, encourage, and conduct needed research in forest resource and shade tree management; and to develop through information, education, and formal publications a greater public awareness and appreciation of forests as Maine's basic economic and renewable resource, of the need to protect the forest resource, and of the economic and social benefits to be derived from multiple use of forest lands.

Although not one of the large landholding State agencies, Maine Forest Service lands (553 acres) are represented upon these maps because of their role as a conservation and forest management agency.

List of lands administered by the Maine Bureau of Forestry and delineated on the set of maps entitled **Maine Land In State and Federal Conservation Ownership**. Numbers refer to the parcel numbers on the maps.

BUREAU OF PARKS AND RECREATION  
Herbert Hartman, Director

*Central Office:* AMHI - Harlow Building, Augusta, Maine  
*Telephone:* (207) 289-3821  
*Mail Address:* Statehouse Station # 22, Augusta, Maine 04330

*Established:* April 5, 1935

*Organizational Units:* Division of Operations and Maintenance, Boating Facilities Division, Maine Rivers Program, Division of Planning and Research, Off-Road Vehicle Division.

The Bureau of Parks and Recreation originated in 1935 with the establishment of a State Park Commission consisting of five members, including the Commissioner of Inland Fisheries and Game (now Wildlife) and the Forest Commissioner, ex officio, and three citizen members appointed by the Governor with the advice and consent of the Council. The Commission was renamed the Maine State Park and Recreation Commission in 1963 to meet federal requirements for U. S. Bureau of Outdoor Recreation funds. Administration of the Allagash Wilderness Waterway was assigned to the Commission in 1965. In 1971, the Commission was abolished and its duties assumed by a new Parks and Recreation Department which, in the state government reorganization of 1973, became the Bureau of Parks and Recreation in the Department of Conservation. The acquisition and development units were expanded and elevated to a departmental level division of Real Property Management, effective July 1, 1984.

The Bureau of Parks and Recreation was established to administer programs to acquire, design, construct, operate, and maintain areas for public enjoyment and recreation. The primary responsibilities of the Bureau are to acquire, develop, and manage State parks and historic sites; to study and report to the Governor the need for such facilities; to provide information and trails for snowmobiles and all-terrain vehicles; to preserve protect, develop, and manage the Allagash Wilderness Waterway; to provide and manage public facilities for boats; to mark the waters of the State for hazards or remove the same; and to manage the Penobscot Corridor.

At present the Bureau manages 70,894 acres of land for the public enjoyment and recreation of the people of Maine.

List of lands administered by the Maine Bureau of Parks and Recreation and delineated on the set of maps entitled **Maine Land in State and Federal Conservation Ownership**. Numbers refer to the parcel numbers on the maps.

## **MAINE DEPARTMENT OF INLAND FISHERIES AND WILDLIFE**

William J. Vail, Commissioner

*Central Office:* 284 State Street, Augusta, Maine

*Telephone:* (207) 289-3371

*Mail Address:* 284 State Street, Augusta, Maine 04333

*Established:* 1880

*Organizational Units:* Bureau of Administrative Services, Bureau of Resource Management, Bureau of Warden Service, Division of Information and Education, Division of Planning, Advisory Council (Inland Fisheries and Wildlife), Atlantic Sea Run Salmon Commission, Junior Maine Guides & Trip Leaders Curriculum Board, Advisory Board for the Licensing of Guides.

The Department of Inland Fisheries and Wildlife (formerly Game) traces its origin back to 1830 when wardens were first appointed by the Governor to enforce the moose and deer law enacted that year. Two Commissioners of Fisheries were appointed in 1867. In 1880, the Commissioners were assigned responsibility for enforcing game laws as well as fish laws, and in 1895, their title was changed to Commissioners of Inland Fisheries and Game. The two Commissioners were replaced by the Commissioner of Inland Fisheries and Game in 1917. Functional Divisions were added as the Department mandates and responsibilities were expanded, e.g., first engineer in 1932; flying Warden Service in 1937; Wildlife Division in 1938; Fisheries Division in 1951; Information and Education in 1955; Program Development and Coordination in 1968; Snowmobile Registration in 1969; Realty in 1970; Watercraft Registration and Safety in 1974, which was combined with Snowmobile Registration to form the Division of Recreational Safety and Registration in 1976. Effective October 1, 1975, the Department was renamed the Department of Inland Fisheries and Wildlife.

The Department of Inland Fisheries and Wildlife was established to ensure that all species of wildlife and the aquatic resources in the State of Maine are maintained and perpetuated for their intrinsic and ecological value, for their economic contribution, and for their recreational, scientific, and educational value to the people of the State of Maine. In addition, the Department is

responsible for the establishment and enforcement of rules and regulations governing fishing, hunting and trapping, the propagation and stocking of fish, the acquisition of wildlife management areas, the registration of snowmobiles, watercraft, and all-terrain vehicles, safety programs for hunters, snowmobiles, watercraft, and the issuing of licenses and permits for hunting, trapping, fishing, guiding, etc.

At present the Department administers 55,608 acres of Wildlife Management Areas for the conservation of Maine's wildlife for future generations of the people of Maine.

List of lands administered by the Maine Department of Inland Fisheries and Wildlife and delineated on the set of maps entitled **Maine Land in State and Federal Conservation Ownership**. Numbers refer to the parcel numbers on the maps.

## **BAXTER STATE PARK AUTHORITY**

James E. Tierney, Chairman

Irvin C. Caverly Jr., Director

*Central Office:* 64 Balsam Drive, Millinocket, Maine 04462

*Telephone:* (207) 723-9616

*Mail Address:* 64 Balsam Drive, Millinocket, Maine 04462

*Established:* 1933

Baxter State Park is the result of a dream of former Governor Percival P. Baxter, who donated the first parcel of land in 1931, and over the years added various parcels until the final acquisition brought the Park to its present size of 201,018 acres. In addition to the various gifts of land, he also left two sizeable trust funds to carry out the operation and maintenance of the Park without the need of State funding. The only exception to this being road maintenance by the Department of Transportation from funds collected through gasoline taxes.

While Baxter State Park bears the name "State", it is separately administered, free from any connection with the larger state park system of the Department of Conservation, Bureau of Parks and Recreation. The Baxter State Park Authority, a three person authority consisting of the Attorney General, the Commissioner of the Department of Inland Fisheries and Wildlife, and the Director of the Bureau of Forestry, has full power in the control and management of the Park and in the exercise of all Trust obligations.

Operation of the Park is financed in part from use fees, entrance fees, etc., but the majority of the funds are obtained from the trusts established by Governor Baxter, namely the original trust established in 1945 and a larger fund established through his will in 1969 administered by the Boston Safe Deposit and Trust Company. Park operations were financed through the State's General Fund until 1971 when they became self-sufficient, as it was felt that the main purpose of Governor Baxter's bequests was to release the State from any obligation for Baxter Park operating costs, except road maintenance.

Responsibility for the operation of Baxter State Park is delegated from the Authority to the Park Director who supervises the managers of the Divisions of Administration, Forestry, and Park Operations.

The Baxter State Park Authority was established to operate and maintain Baxter State Park for the use and enjoyment of the people of Maine in accordance with the wishes of its donor, former Governor Percival P. Baxter, that this park ". . . *shall forever be retained and used for state forest, public park and public recreational purposes . . . shall forever be kept and remain in the natural wild state . . . shall forever be kept and remain as a sanctuary for beasts and birds.*"

The primary responsibilities of the Authority are to operate and maintain various campgrounds and campsites within the 201,018 acre wilderness Park; to protect the fauna and flora within the Park for the enjoyment of present and future generations; to receive and expend monies from the trusts and other income for the maintenance and operation of the Park; to acquire additional land for the park as authorized by law; to establish rules and regulations as necessary for the protection and preservation of the Park, monuments, and structures thereon, and for the protection and safety of the public; and to exercise police supervision over the Park.

Baxter State Park is delineated on the Millinocket and Presque Isle Quadrangles of the set of maps entitled **Maine Land in State and Federal Conservation Ownership**. In addition to the 201,018 acre Park, the Baxter State Park Authority holds title to the 250 acre Austin Cary Tree Farm in Harpswell, and the 225 acre Mount Chase State Forest in Mount Chase. See p. 43 for the location of these properties.

## **MAINE BOAT LAUNCH SITES**

In addition to the lands held by various state agencies for the purpose of conservation and/or recreation, there are 75 boat launch sites owned by the State of Maine to provide the people of Maine with access to the many streams, rivers, and lakes of Maine.

List of Maine owned-boat launch sites administered by the Department of Inland Fisheries and Wildlife, the Bureau of Parks and Recreation, the Bureau of Public Lands, and the Department of Transportation, delineated on the set of maps entitled **Maine Land in State and Federal Conservation Ownership**. The numbers refer to the parcel numbers on the maps.

118. Moosehorn NWR-Edmunds Unit (USF&W)

### **Sherbrooke Quadrangle**

- 119. Jones Pond (NPS)
- 120. Appalachian Trail Corridor (NPS)

### **Millinocket Quadrangle**

- 121. Appalachian Trail Corridor (NPS)
- 122. Appalachian Trail Corridor (NPS)
- 123. Appalachian Trail Corridor (NPS)
- 124. Appalachian Trail Corridor (NPS)
- 125. Appalachian Trail Corridor (NPS)
- 126. Appalachian Trail Corridor (NPS)
- 127. Appalachian Trail Corridor (NPS)
- 128. Appalachian Trail Corridor (NPS)

### **Fredericton Quadrangle**

- 129. Moosehorn NWR-Baring Unit (USF&W)
- 130. Whitlock's Mill Light (USCG)
- 131. St. Croix (Dochet) Island (012) (NPS)

\* abbreviations used:

USCG	United States Coast Guard
USF&W	United States Fish and Wildlife Service
USFS	United States Forest Service
GSA	General Services Administration
USAF	United States Air Force
NPS	National Park Service
NWR	National Wildlife Refuge
WPA	Waterfowl Production Area

Number in parentheses after island name  
refers to the Maine Coastal Island Registry

## APPENDIX

### Statistical Summary of Maine Land in State and Federal Conservation Ownership

<u>State Agency</u>	<u>Number of Acres</u>
<b>Department of Conservation</b>	
Bureau of Public Lands*	452,895
Bureau of Parks and Recreation	70,894
Bureau of Forestry	553
<b>Department of Inland Fisheries &amp; Wildlife</b>	55,608
<b>Baxter State Park Authority</b>	<u>201,493</u>
<b>State of Maine Total**</b>	781,443
<u><b>Federal Agency</b></u>	<u><b>Number of Acres</b></u>
<b>Department of Agriculture</b>	
U S Forest Service	52,850
<b>Department of the Interior</b>	
U S Fish & Wildlife Service	41,786
National Park Service	60,000
<b>Department of Defense</b>	
U S Air Force	372
<b>Department of Transportation</b>	
U S Coast Guard+	360
<b>General Services Administration</b>	<u>1</u>
<b>Federal Agency Total</b>	155,369
<b>GRAND TOTAL</b>	<b>936,812</b>

\* Total for The Bureau of Public Lands does not include islands, ledges, and rocks under one acre in size totaling perhaps as much as 530 acres.

\*\* Totals do not include State-owned boat launch sites, some of which are included within larger parcels.

+ Total for the U S Coast Guard is based upon the best information available from the Maine Coastal Island Registry and the Maine Historic Preservation Commission.

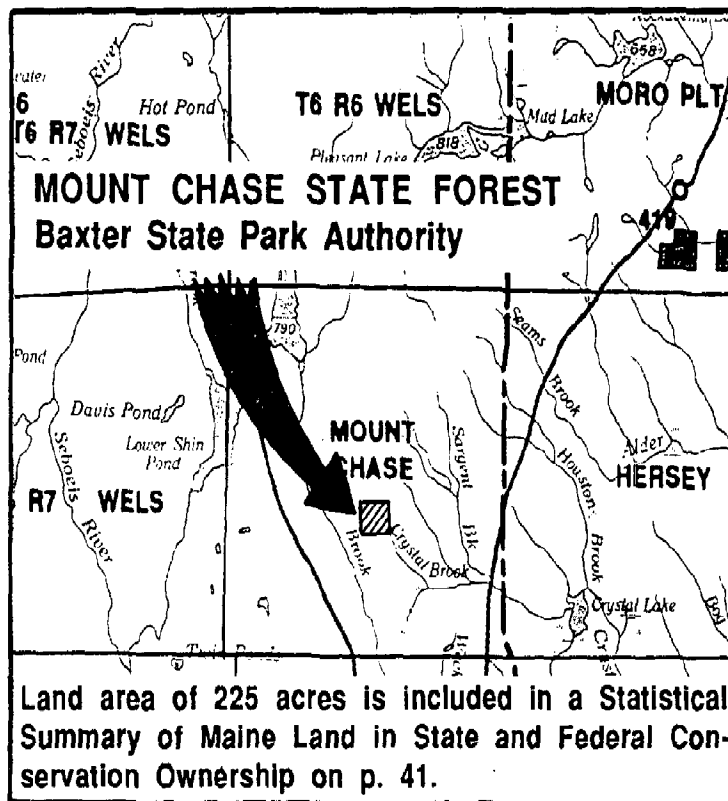

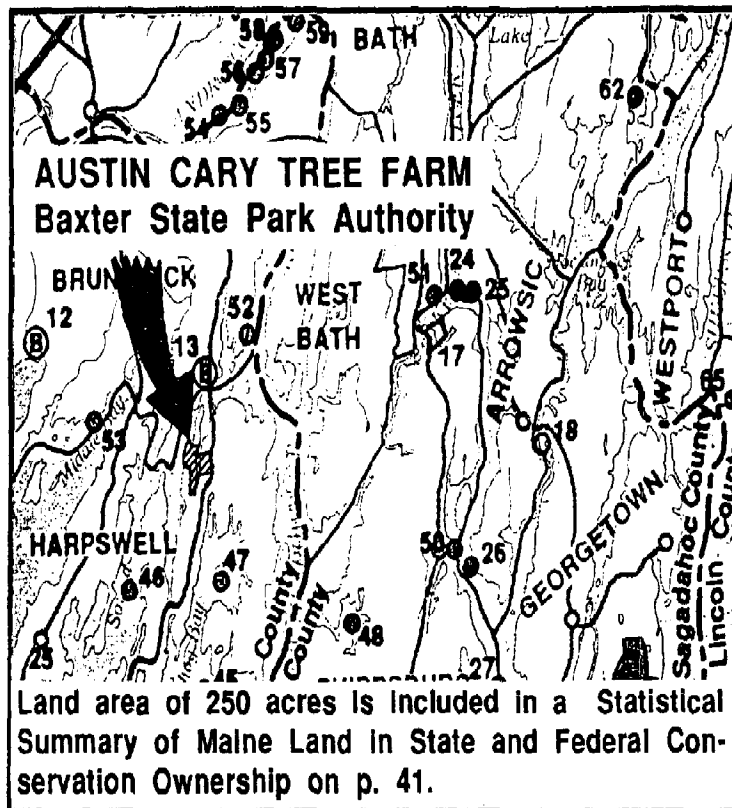

**Errata:**

Bath Quadrangle: Federal Lands #31 is owned by the US Coast Guard.

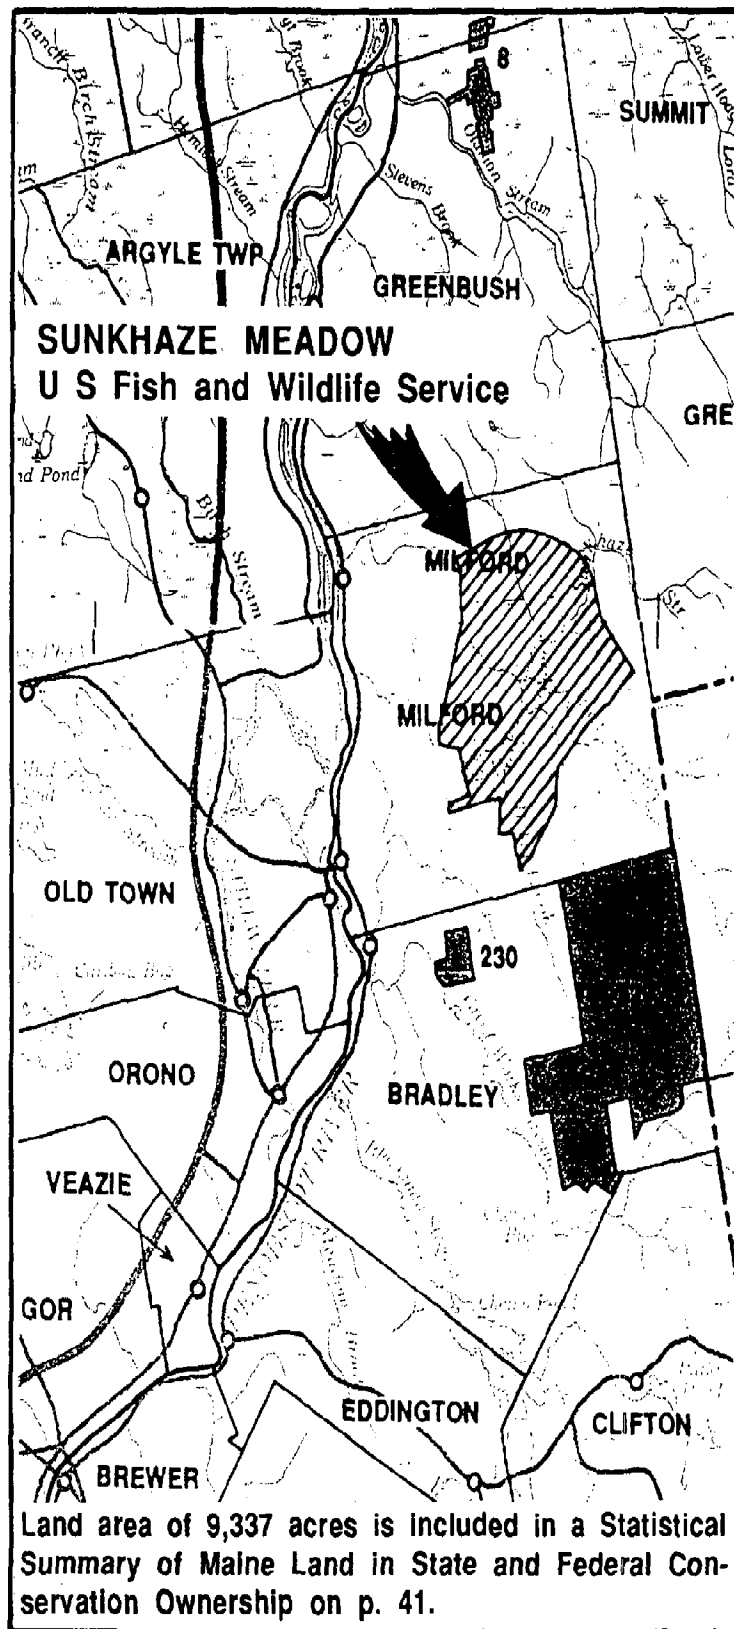

Millinocket Quadrangle: Maine Bureau of Parks and Recreation #88 Peaks-Kenney State Park, should read Peaks-Kenny State Park on list.

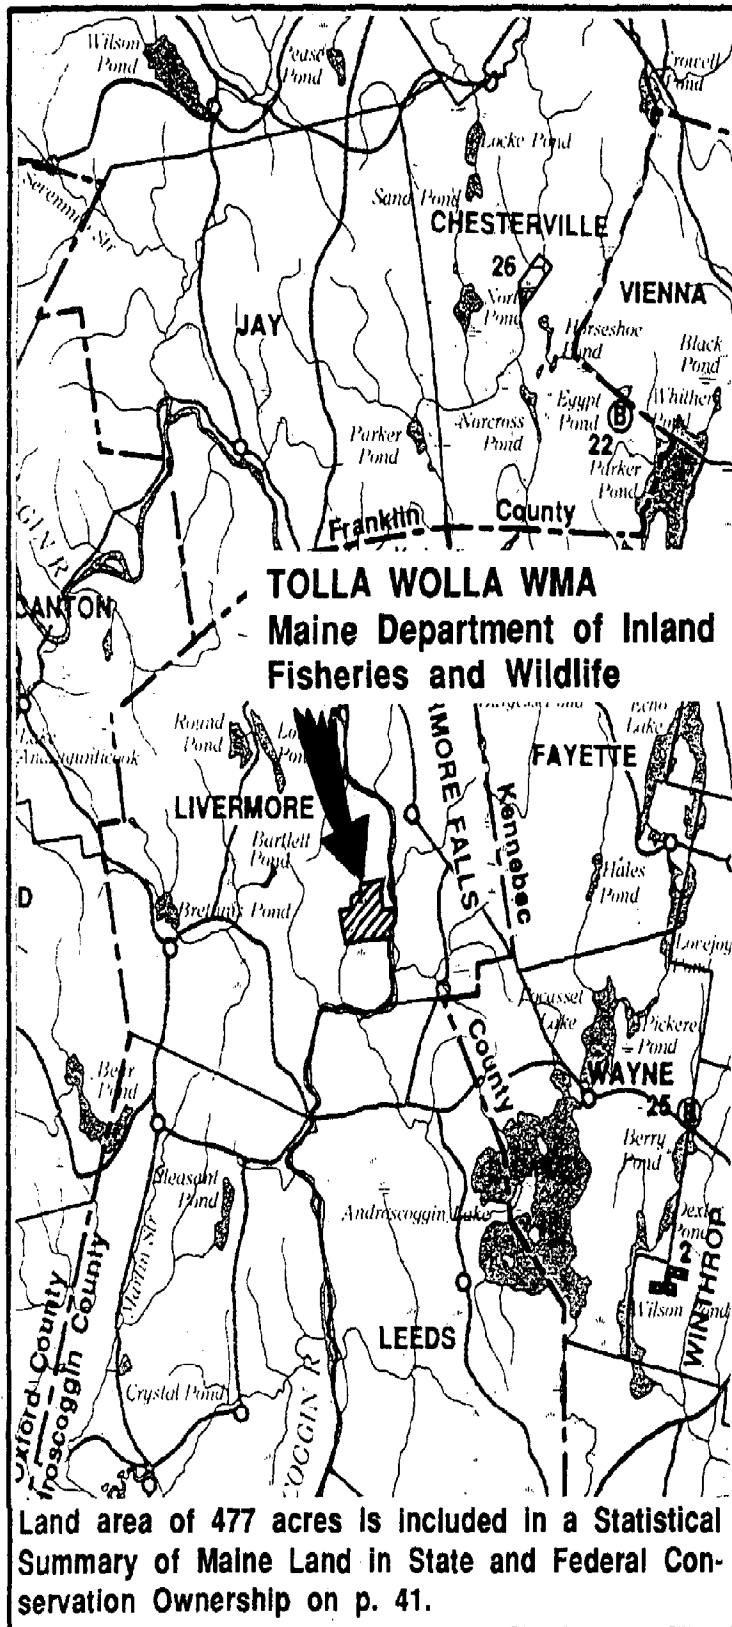

Fredericton Quadrangle: Maine Bureau of Public Lands #396 and #397 should read No. 21 Twp. on list.

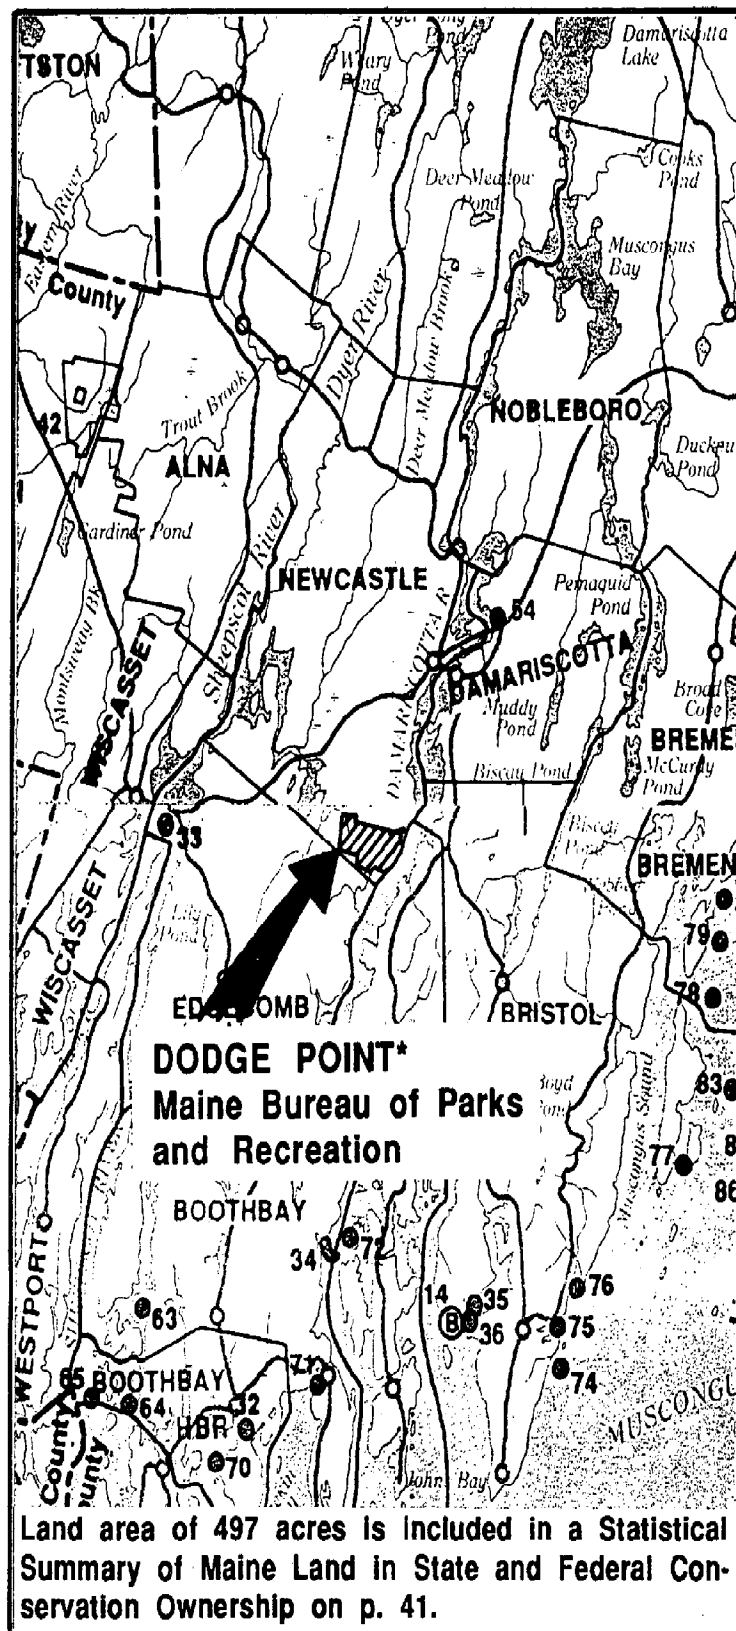

Bath Quadrangle: Federal Lands #44, Mt. Desert Rock Light, Coastal Island Registry Number is 561.

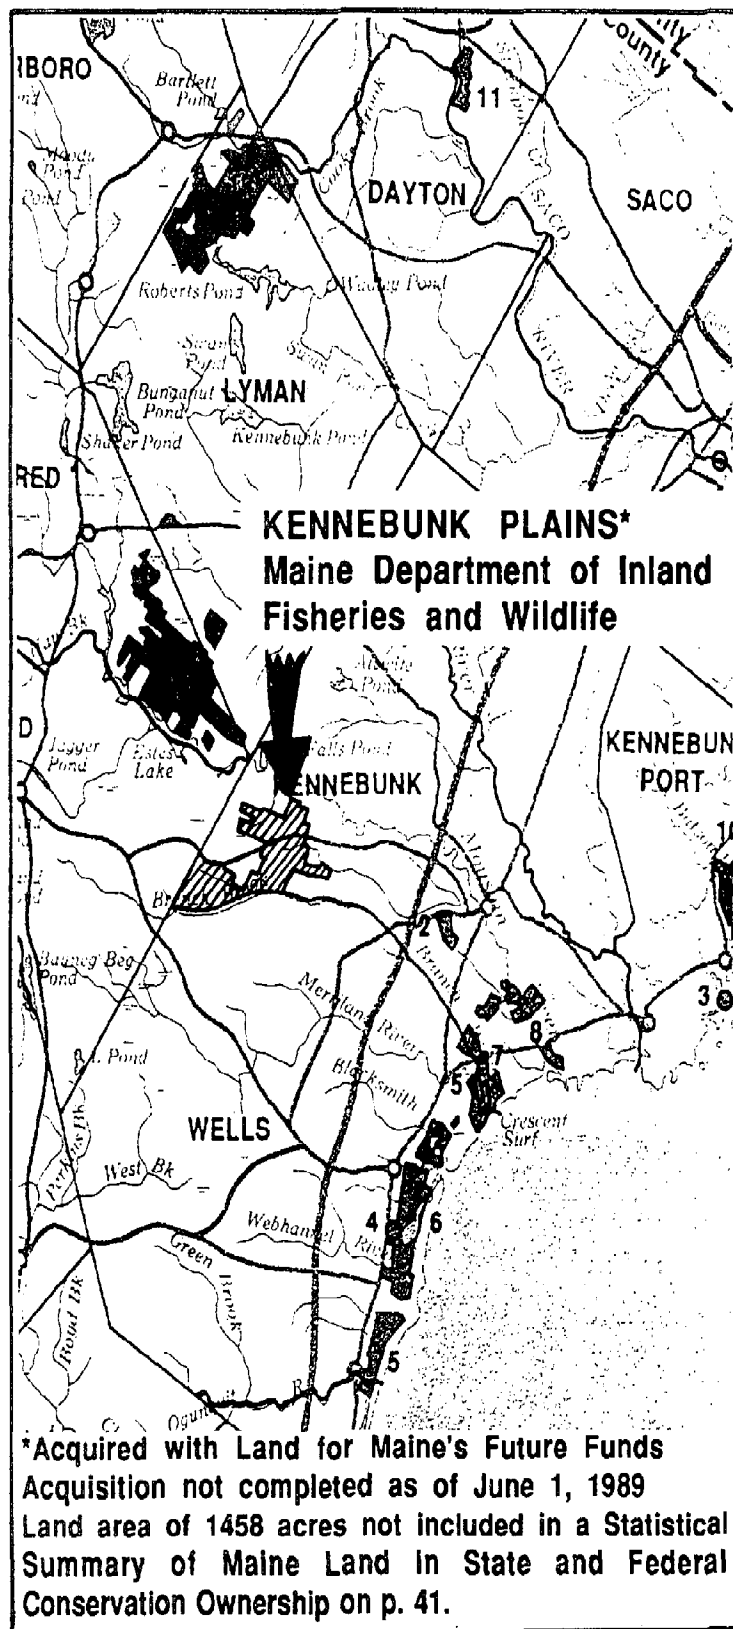

## MEMBERS OF THE LAND FOR MAINE'S FUTURE BOARD

### State Agency Members:

Richard H. Silkman, Chair  
Maine State Planning Office

C. Edwin Meadows, Commissioner  
Department of Conservation

William J. Vail, Commissioner  
Department of Inland Fisheries  
and Wildlife

Bernard Shaw, Commissioner  
Department of Agriculture and  
Rural Resources

William Brennan, Commissioner  
Department of Marine Resources

### Public Members:

Marion Fuller Brown  
Ram's Head Farm
